

06.29.20 TAP Release

Restricted the Attendance Approval screen so that only sponsors designated as the primary parent (PC) on the case would have access to this screen to approve attendance. All other sponsors designated as "parent" will not have access to this page.

Removed the "Start Date Range" and "End Date Range" from the Customized Schedule Category. Since there was no year associated with these ranges, it was causing us problems when entering the correct customized school schedules. The required date ranges that school age children must have a school schedule in place was already being handled by software code in KT, so this feature was no longer necessary.

Removed items on the Search Criteria section of the Provider's Attendance > Transactions screen (source, device id, device type, and device serial). These items were not applicable to the provider's view of this screen.

Corrected an issue where new authorization alert messages were being generated for children to whom the provider did not provide care.

Added a new screen to the Staff Activities menu. It contains a list of all children scheduled at the provider on the current day. The child names will be sorted in alphabetical order and grouped into two sections as follows:

Children Checked In: ### (number of children)

Child 1 Last name, first name

Child 2 Last name, first name

Child n Last name, first name

Children Checked Out: ### (number of children)

Child 1 Last name, first name

Child 2 Last name, first name

Child n Last name, first name

The screen will be shown/hidden based on a KinderConnect site setting "Enable Attendance Summary" and is only viewable by providers.

*This new screen is only available with the latest version of KinderSign (version 2.4.33).

The vendor wrote a script to remove from production all of the new erroneous authorization messages (reference #16770 above) that were sent to providers for children that were not in their care. This was done to avoid any confusion at the provider level.

| |
|--|
| <p>The log-in screens for both KinderConnect and KinderTrack were updated by Controltec.</p> |
| <p>Corrected an issue in the Attendance > Detail screen that prohibited the user from deleting attendance if there was a midnight entry.</p> |
| <p>Corrected an issue with duplicate attendance. The system will now use the Transaction Time to identify duplicate attendance entries. Duplicate attendance is identified based on Child, Provider, Operator, Device, Attendance Date and Time, Attendance Type (in/out), and now the precise time the transaction was created.</p> |
| <p>Removed "Pandemic Days" from the drop-down menu in KinderConnect under absent days. From 5/31/2020 on, Pandemic days can only be claimed by programs that are asked to close by the Health Department. These programs will notify the JFS Business Unit and the Business Unit will add the pandemic days to the program.</p> |
| <p>Corrected an issue where the provider was unable to enter an "absent" day nor a "school session out" day on the KinderSign tablet.</p> |
| <p>Corrected an issue where some cases were not being transferred into KinderConnect from KinderTrack.</p> |
| <p>Corrected an issue where private pay children were not being displayed on the Sponsor > Detail screen.</p> |
| <p>Updated the system to show the new KC logo on an error page.</p> |
| <p>Updated the Help files in KinderConnect to display the new TAP logo on the Login page.</p> |
| <p>A new version of KinderSign will follow this release (currently scheduled for July 8, 2020). The new version of KinderSign will be 2.4.33.</p> |
